WOOCOMMERCE AS A SUBCONTRACTOR

Online stores, ERP and POS integrations

Online stores with integrations and scheduled services running behind them: a catalogue synchronised with a POS, a Visma Nova integration and a local copy of production.

Engagement: Invoiced by the hour through my own company, GG Solutions Oy (Finland), on IT2018 terms or your subcontracting agreement. Remote, or hybrid from Helsinki.

ONLINE STORES

camu.fi

2020–2023

Developer & maintainer

Online store with 8,000+ products and continuous POS synchronisation

- XML-based product and stock synchronisation with the POS every five minutes: millions of SQL statements a day without slowing the storefront down.
- **14 separate background services:** product sync, order export, stock updates, image repair and optimisation, SEO scripts, a Shopping feed, database cleaning and cache warming.

WordPress WooCommerce PHP MySQL Redis Python XML

westface.fi

2022–2026

Developer & integration owner

Facade-panel store integrated with the Visma Nova / Loocos ERP

- **Two Python microservices connect the store to the ERP:** an importer unpacks the Nova archive and upserts the catalogue through the WooCommerce REST API (stock, price, status, categories, brand, facade attributes); an order exporter runs the other way.
- A full local Docker replica of the production store so changes can be tested without touching sales, including cache purging and URL rewriting.

WordPress WooCommerce PHP 8.2 MySQL Python WPML Visma Nova Docker

whitebalance.fi

2022–2026

Developer

Climbing and outdoor gear store (operated by Kiipeilytekniikka)

- The same Nova / Loocos integration pair as westface, adapted to a different attribute model (brand, colour, size) and a different order-storage mode.
- **A runtime translation layer with TranslatePress:** products are stored in Finnish only, so no duplicate post is created per language.
- A local development stack with its own shims (REST authentication without HTTPS) clearly marked local-only so they can never reach production.

WordPress WooCommerce 8.4 PHP 8.2 MySQL Python ACF TranslatePress Docker

MORE PROJECTS

tilasa.fi

2018

Built to last: the site has been in uninterrupted production since 2018 and still runs in 2026 without a rebuild.

WordPress WooCommerce PHP

kiipeilytekniikka.fi

2025–2026

A local Docker clone of the production site with database import, so changes can be made safely before release.

WordPress PHP MySQL Docker

Palsbo: space management and form protection

2021–2026

Spam protection on contact forms with Cloudflare Turnstile, with the plan and spec written down before any code.

PHP WordPress Python Cloudflare Turnstile XLSX

Shared development infrastructure

One Docker stack (MySQL 8, Redis 7, Mailpit) serving every project on a shared network: databases are created by script, each project joins the external network, and its launcher brings the infrastructure up automatically if it is not already running.

Docker Compose MySQL 8 Redis 7 Mailpit Bash

TECHNICAL SKILLS

Core Working

Backend

Python Django Flask PHP Laravel REST API SQLAlchemy WordPress / WooCommerce FastAPI Node.js Celery

Frontend

React Redux Toolkit Vite Konva / Canvas HTML / CSS TypeScript MUI Tailwind Vue.js ii8next jQuery

Databases

PostgreSQL MySQL MariaDB SQLite Redis SQL-massakäsittely

Data & integrations

Gmail API Google Sheets API Telegram Bot API / Telethon XML / CSV / XLSX ETL WooCommerce REST Web scraping Proxy-rotatio Google Calendar API

EXPERIENCE

Entrepreneur & Full-Stack Developer

2017 to present

Gromyko Jyri Tmi. / GG Solutions Oy · Helsinki, Finland

My own sole trader business and limited company. I own client projects end to end: scoping, architecture, implementation, production rollout, maintenance and invoicing.

- **API and database architecture:** REST APIs, multi-step migrations, bulk SQL processing and synchronisation with POS and ERP systems.
- **Full-stack applications and SaaS products:** React / Vue.js front ends, Python, Django, Laravel and Flask back ends, PostgreSQL and MySQL databases.
- **Server operations and deployment:** Docker / Podman Compose, systemd + Nginx, Redis, Celery, shared development infrastructure across several projects.

Military service · Finnish Defence Forces, Jaeger Brigade, Sodankylä, Northern Lapland (6 months)

HOW I WORK

A reproducible environment

Every project starts with one command on a clean machine.

Idempotency by default

Re-running an accounting job, a product sync or a lead import must never create duplicates.

Evidence before assertions

Nothing is declared done until the tests have run and the output has been read.

EDUCATION

Bachelor of Science, AI in Business · IU International University of Applied Sciences · 2024 to present · Distance learning

9+ years of production code · Self-taught & practice · 2017 to present

LANGUAGES

Finnish native · **English** fluent · **Russian** advanced · **Swedish** beginner

REFERENCES

"Jyri built the tilasa.fi website for Tilasa back in 2018. It still runs in 2026. I recommend Jyri for his expertise and the quality of his work."

Jussi Jokinen, Tilasa Oy

"Delivers what he promised, on time and with care. Thank you!" Miika Junttila, Peer Car Share Oy
